What's New in the?

Hey guys, This product was made with one goal in mind: to cut down on your testing and deployment cycle. Every test deployment is not only time consuming, but it is also easy to make mistakes. So I created CRM Solution CommandLine Helper to save you from these common mistakes. CRM Solution CommandLine Helper is a console utility designed to automate all the process of importing, exporting and publishing solutions in Dynamics CRM. See how it can cut your work in half when you make your first test deployment. It's powerful enough to easily perform all the tasks required to deploy a solution. But it's also not too heavy on resources, to help you quickly test on your main or test environment. Key features: 1. Graphical tool CRM Solution CommandLine Helper is a graphical console and tool, that is easy to use and requires no training. 2. Automatic deployment Create fully-functional scenarios for importing, exporting and publishing solutions. CRM Solution CommandLine Helper Features: Graphical console Automated deployment Detailed logs Powerful tools to import and export solutions Features list: 1. Fully automated deployment 2. Detailed logs 3. Automatic deployment 4. Graphical console 5. Powerful tools to import and export solutions 6. No training required This tool is specially designed to save your time and work as much as possible. And it doesn't let you make any mistake. Installation and deployment time is very short, and each test deployment is as fast as other solutions (if not faster). CRM Solution CommandLine Helper is fully customizable and can be set up to your needs. If you want to add new solution records to your database; if you want to provide your own URLs and paths; if you don't want to manually change the parameters of your bindings to avoid post-deployment errors, then CRM Solution CommandLine Helper is the tool you need.

How to use the software CRM Solution CommandLine Helper automatically communicates with your Dynamics CRM database and executes all tasks required to import, export and publish a solution. CRM Solution CommandLine Helper is a console tool with a graphical user interface, which makes it easy to use and does not require any training. CR
