Older CAD applications In addition to support for 3D CAD, there were a number of older applications that were in the field that AutoCAD replaced. 3D Architect is a legacy application, only updated to show 3D capabilities in AutoCAD. This application is capable of reading DWG/DWF files and plotting them. It can import parametric surfaces from 3D SLD files and export them. K-Autocad is a version of the Autocad on the K-System workstation. It is originally a program that drew 2D plans and 3D views on the DOS workstation and could export them to DWG files. It could also import AutoCAD DWG files. The early versions had basic 3D capabilities. The latest version, 4.0, supports 3D drawing with few limitations. K-Autocad's windows could be customized with icons and text. Canon's personal CAD/CAM program (originally called CAM), was based on the Autocad program and could export to DWG and DXF files. The latest version, 5.0, allows for the import of DXF files into the application and

conversion of DXF files to AutoCAD. Bryce is a legacy application. It provides a 2D, 3D and animation version. The latest version, 7.0, now supports 2D and 3D. Bryce is capable of both exporting to DWG and DXF files. Photogrammetry applications (3D scanning and photogrammetry) are currently a major industry in the 3D field. One of the first personal photogrammetry programs was Autoscout Pro, written by Richard Snyder and originally written for DOS, then later rewritten for Windows and Linux. Summary The Autodesk family of products was established by a company called Autodesk in 1982. At this time, the software was available for both a personal workstation and for a workstation used for a multi-user design and drafting office. In 1991, Autodesk released AutoCAD, which is still available today. This allowed for the creation of an entire drafting office for just one person. One of the most basic design tools was the 2D drafting program, Drafting Assistant. This program allowed for drafting with a collection of templates. Over the years, Autodesk has steadily improved their design software and has added 3D capabilities as well. In 2004, Autodesk released ca3bfb1094

Newtown home a 'temple of darkness' A NEWTOWN, Conn. — A woman charged with killing a mother and her three daughters in her home where a mass shooting took place at a Connecticut elementary school tried to keep her husband out of the bathroom, a sheriff's official said Wednesday. Yale University graduate and family friend Shannon Guess Richardson was charged last week with three counts of capital murder in the Dec. 14 slayings of the mother, her daughters and herself at the home of the slain girls' mother, Nicole Hockley. The Associated Press The bodies of the mother, 34-year-old Jacqueline B. Baker, and her daughters, 15-year-old Sydney A. Hirschfeld, 14-year-old Jessica L. Richardson and 7-year-old Avielle A. Robertson, were found in their beds on Dec. 14. Richardson was found dead in the bathtub. In an interview at her home in Newtown on Wednesday, Richardson's boyfriend, Brian Joseph Ficcadenti, 50, said the woman tried to keep her husband out of the bathroom. He said Richardson told him she was worried about him "looking in the medicine cabinet." Ficcadenti said he didn't believe Richardson knew about his affair with another woman, according to the Hartford Courant. He also told the newspaper that Richardson said her relationship with the husband "was the real problem." Ficcadenti said he doesn't know if Richardson took any of the family's guns, which included a.38-caliber revolver and three rifles, the paper said. Authorities have said one of the girls was killed with a.22-caliber rifle and the other two were shot with a handgun. They haven't said what was used to shoot the mother. The sheriff's office said it also had a full report from Richardson's autopsy, which is pending toxicology results. The doctor who performed the autopsy told The Associated Press that it appeared the mother and girls had been shot after Richardson was shot. Police said Richardson told her husband she had gotten into an argument with his ex-wife and had bought the gun to protect herself. He told detectives that he came home that day, saw Richardson in bed, and left when she told him she was going to shoot herself. He said she appeared to be asleep. He told police he did not know where she had gone or why. Police have said they
