Total Recorder 4 by 3DBrookie.. 3D total recorder v4.0.4 + patch v4.1.0.. And features within the 3D Total Recorder include:. AxilSoft 4.2.10 Crack With Keygen & Serial Number Full Version. .1. Field of the Invention The present invention relates to paint coating systems and more specifically to a system that employs a disposable dipstick and a paint reservoir wherein the paint reservoir and dipstick are a single unit that can be rapidly interchanged. 2. Description of the Prior Art Many paint coating systems of the prior art include a paint reservoir and a dipstick that are permanently interconnected. Most conventional dipsticks are designed to be penetrated by the end of the brush used for coating the workpiece. Thus, any improvement to the dipstick that would permit the paint to be withdrawn from the reservoir through the opposite end of the dipstick would constitute a useful advance in the art. In most cases, the interconnection of the reservoir and dipstick is permanent. This is because it is difficult to design a dipstick that can be quickly disconnected from the reservoir. It is desirable to be able to quickly replace the dipstick when it becomes damaged or clogged. Replacing the dipstick with a new one can prevent the reservoir from being able to properly fill with paint to the desired level. Consequently, a more durable and reliable connection is required between the reservoir and dipstick. Conventional dipsticks are unable to remain airtight when submerged in the paint even for short periods of time. Paint is nearly viscous and if the pores of the dipstick are not filled it will drip when placed in the reservoir. Other problems encountered in the prior art are: When a dipstick is required to extend beyond the opening of the reservoir, it is generally quite difficult to extend the dipstick into the reservoir. In most cases, the reservoir is not completely filled with paint and some part of the exposed part of the dipstick remains in the reservoir. This must be removed either by hand or by scraping. It is

generally difficult to remove the entire exposed part of the dipstick without leaving some paint in the opening of the reservoir. This can result in spillage if the dipstick is not completely removed. The excess paint can also be a liability if the reservoir is a "conventional" reservoir. Paint storage tanks of the prior art that employ dipsticks are much more expensive than the present invention. 6d1f23a050
