The Sims 4 RELOADED Update 5 NO ORIGIN Crack Mr DJ The Game

i've had the game for a month now and it seems to randomly crash about once a day. i'm unable to launch the game because no mod is stored on my device. i'm not able to play any others either because this game becomes unresponsive when any other game is installed. every attempt to reset to factory settings fails and it returns to previous version (which seems to be a 'normal' version). i wish i could just delete the game from my phone. an error occured while loading the application. loaded apk: /data/local/tmp/thesims.apk could not find path as library: /data/app/imangazy.fqc.sims4.en-us.so/.soapopen.soapopen (bad version name "@2.84.0.9") (you should get the error if you have 2.9 for this mod, i'm running 2.8) could not find main class i really want this to work because it's my only sims 4 game on my computer as it's the only way i can play it on my macbook. any ideas? i've tried uninstalling it and starting over a few times as i've come to expect from the sims 4 franchise, but to no avail. i want my game to work but all of my downloads are gone and all my save data is gone. i am unable to install updates or anything. my phone is on the verge of being reset and wiped. i need someone to help me fix this issue. hi guys. just got the sims 4, downloaded the patch and everything (as stated in the name). but when i restarted and loaded the game, the option to have all the contents unlocked doesn't show up. i just have the normal pack unlocked. what can i do to fix it? thanks in advance! [size=17] warning: there may be trouble on your pc before starting the game, you might want to check for updates on your os and your pc, download all the ones you need, then restart your os to see if there is some kind of lumia update for your phone (most probably for windows users), restart your pc and try to launch the game to see if there are no issues. if none, then try to launch the game (without updates) again and this time, you should see this on your option menu, if not, check out the forum topic below. 5ec8ef588b
