I prefer to organize the music with alphabetical and artist, all the information is on my computer when I buy the disk. This way I can never be lost or worry about misplacing something important. These days I rent movies from the library or netflix. I never like to carry around a dvd of music or movies around. As in Nero's Live Functions, you can upload images to a folder of your choice. I created "Movie Images" folder in the Music folder (c:Music) and put all images there. I check this folder to see what images are missing when downloading a movie from the net and those have to be added to your torrent and the movie starts to receive them. I downloaded this video using winRAR 3.00 beta 3. With this beta, I get the following error message in utorrent: "D:\Downloaded videos\Seasons\Season\21\Episode\Xena: Warrior Princess - Sarah Michelle Gellar.r00 (1) - download failed (512 bytes)". The larger file size that is displayed in utorrent is slightly smaller when viewing in winRAR. Thanks for your assistance. I tried to download the same video using winRAR 3.00 beta 3. With this beta, I get the following error message in utorrent: "D:\Downloaded videos\Seasons\Season\21\Episode\Xena: Warrior Princess - Sarah Michelle Gellar.r00 (1) - download failed (512 bytes)". The larger file size that is displayed in utorrent is slightly smaller when viewing in winRAR. Every time I try to search for a movie, I end up with the same problem. Every time I do a movie search and then try to search for a movie, I get the following message: "The specified search cannot be executed". Every time. Why is it happening and how can I get rid of this error?
