What's New in the Tiny Multi Bootloader (formerly Tiny Avr Pic Bootloader)?

=====
=====
Tiny Multi Bootloader+ is a standalone bootloader. It can be used to flash tiny (MSP430) microcontrollers. It supports different operations, including programming (PIC24 and PIC16), verification (PIC24), HEX file downloading and flashing, as well as resetting (PIC24 and PIC16), etc.

=====
=====
Features:

- =====
=====
1) Flash programming for PIC24 and PIC16 family of microcontrollers. 2) Restart MCU during programming and verify the HEX file. 3) Support multiple upload channels, so you can transmit all uploads at the same time. 4) Interrupt the program flow during upload. 5) The software program is simple to use and the compiler is friendly. 6) Erase unused flash to save the

memory.

=====

===== .. image:: .. image:: .. image:: .. image::

=====

===== Version History:

=====

===== 1.2 2020-01-16 ----- - On PIC24 only, the upload port is now loaded directly from.hex file. - Optimized the code and speed up by a large extent. - Adjust the file reading code of PIC24 so that it's no longer an issue of a low file size. - Added a program option: overwrite the program of the flash memory if there's a possibility that it's corrupted. - Added a new feature to download a.hex file to the microcontroller. - Added an instruction to reset the PIC to enable the download of a.hex file. - Added an option to change the upload port and speed up the uploads. - Added an option to reset the PIC and enable uploads. - Added a feature to copy the content of a file to a file and do checksums.

System Requirements:

Recommended: The minimum requirements are as follows: Hardware: CPU: Intel Core i3 @ 2.13 GHz or greater Memory: 4 GB RAM Graphics: Nvidia Geforce GTX 460 or greater (any shader count will do) OS: Windows 7 or greater Additional Notes: You'll need to use Windows 7 or greater to play the game, there is no way around this. Download: Windows and Mac download links are provided on the download page, but there are some additional notes
